

# Network Visibility and Security Agility For Finance Sector

Financial entities are top targets for cyber attacks, and they need to be on the cutting edge of security strategy, ready to adopt the latest technologies to combat evolving threats. In a new era of digital banking and low latency transactional services, financial institutions need to address security challenges without compromising network performance and reliability. At the same time, security and networking teams need to enable important digital business initiatives for constantly evolving applications and resources. Teams need a new level of agility to make changes to networking and security to accommodate these quickly and efficiently.

- Inline bypass for threat prevention tools
- 100% packet flow visibility for network traffic intelligence
- NetOps and SecOps tools' efficiency
- Deep visibility into encrypted traffic
- Efficient data traffic collection for forensics/SIEM

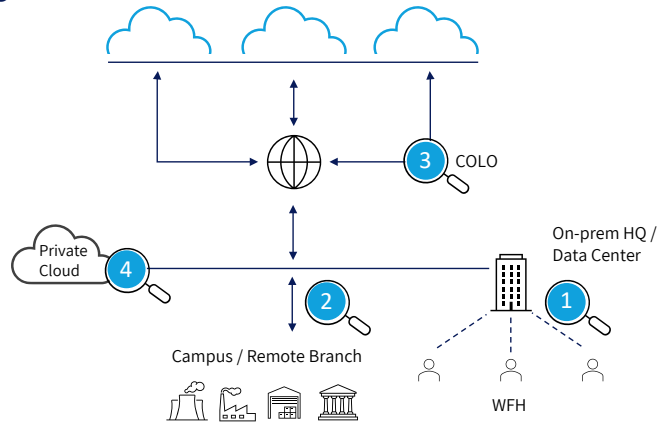

Niagara Networks' visibility solutions are deployed in mission-critical financial markets worldwide. Our experience in complex projects has created superior value for our customers who deploy reliable, high-performance and flexible visibility solutions to maintain agile NetOps and SecOps operations to ensure top cyber resilience and network resiliency. As a result, high-performance and cyber resilient financial services can innovate and scale to new offerings, maintain business continuity, and customer trust.

## Highlights

- Packet filtering & inspection for all layers up to L7 to enable network intelligence applications
- Aggregation/replication/optimization of traffic from sources to central security and monitoring tools
- High-availability – carrier-grade bypass for in-line tools - maximizing network uptime
- Load Balance for heterogeneous solution tools 1:1, 1+1, n+1 with actionable agile rules
- Tunnel handling: GTP filtering, GRE termination, MPLS/VXLAN filtering and stripping
- Embedded 3rd party virtual security tools into Niagara Networks' Open Visibility Platform
- SSL/TLS Decryption for deep flow visibility

## What problems do we solve?

Visibility platform  
Positioned at strategic  
Point of any network

Streamline & scale  
networks, services  
and security posture

Save CAPEX  
reduce cost of tools and  
infrastructure optimization

Reduce risks by enabling  
visibility and access to 100%  
of production traffic and  
enable 100% of network/  
tools uptime

## ABOUT NIAGARA NETWORKS

Niagara Networks™ is a Silicon Valley based company that pioneered the Open Visibility Platform™ to bring desperately needed agility to network security.

Niagara Networks provides high-performance, high-reliability network visibility and traffic delivery solutions for the world's most demanding service provider and enterprise environments.

We Design, Develop and Manufacture our Products in Silicon Valley, USA.
